

Episode: Latest COVID-19 vaccination arrangement

[English Script]

- 0:02 Recently, the COVID-19 activity has continued to increase.
- 0:06 Vaccination can effectively prevent serious COVID-19 cases.
- 0:09 Public should stay alert for the latest vaccination arrangement.
- 0:12 As the vast majority of the public had past COVID-19 infection, the arrangements for initial vaccination has been simplified.
- 0:18 Persons aged 5 or above are considered to have completed initial vaccination by receiving one dose of mRNA COVID-19 vaccine or two doses of inactivated vaccine.
- 0:27 Persons aged 6 months to four years who have been infected with COVID-19 are considered to have completed initial vaccination by receiving one dose of mRNA COVID-19 vaccine or two doses of inactivated vaccine. For those who have not been infected, they should receive two or three doses of vaccines in accordance with recommendations of the vaccine manufacturers to be considered as having completed initial vaccination.
- 0:48 The vaccination arrangement for the high-risk priority groups remains unchanged. They can receive booster doses for free at least six months after the last dose or COVID-19 infection.
